

560AC

Discover why Zamboni is the overwhelming choice
for ice rink operators throughout the world.

Zamboni Model 560AC provides energy efficiency
without compromise of performance.

The PLUS+1™ dash display enables operators to monitor the resurfacing in progress and make adjustments on demand. Zamboni's new One-Touch mode uses customizable settings for auger speeds, electronic water valves and blade control for improved ease of operation and a more consistent ice surface.

The 560AC is the electric solution with the power to meet the needs of today's busy arena surfaces. The AC motors/controls and load sensing hydraulic system increase efficiency providing more resurfacings per charge.

The design of the 560AC integrates state-of-the-art technology with standard features including an automatic snow breaker, hydraulically actuated snow tank lid, and the Zamboni Advanced Water System (AWVSM) resulting in a simplified resurfacing process and a superior sheet of ice.

The 560AC is the new standard for emission-free reliability with unparalleled power.

The Ultimate Machine

Streamlined conditioner design with internal-drive horizontal auger provides additional maneuverability.

Electric water valves and blade control eliminate control rods and blade wheel.

Hydraulically actuated wash water pump relocated for easier service access.

Replaceable poly runners serve as protective wear strips for the sides of the conditioner.

Electronic Controls

Dependable Sevcon® Gen4 AC controls. PLUS+1™ interactive color display provides the choice of an automated One-Touch resurfacing, or the independent control of each process. Establish custom saved settings for consistent performance with multiple operators. On-dash diagnostics provide real-time information with troubleshooting capabilities.

Battery and Charger

Industry proven lead acid batteries. Microprocessor controlled chargers for long battery life.

Drivetrain

Four-wheel drive. Rugged axles offer an industry leading load bearing capacity of 6400 lbs (2903 kg) per axle. 24hp AC traction motor.

Hydraulics

Electronically controlled proportional hydraulic valves and load sense hydraulic pump provide increased efficiency and power on demand. Vertical and horizontal auger motors maintain selected speeds under load. High capacity oil tank. 11hp AC pump motor.

Construction

Strong 2" x 5" all-welded structural steel chassis. Premium primer and paint, stainless steel water distribution pipe and polyethylene water tanks. Vertical auger enclosure reduces operator area sound.

The Ultimate Machine

Over 60 years ago, Frank Zamboni set out to create the first ice resurfacer for his own ice rink.

Trusted & proven performers, Zamboni® ice resurfacers bring unequalled quality & superior value to the rink every day.

In the early 1940's, Frank Zamboni saw the need for a machine to quickly produce an attractive sheet of ice at his rink in Southern California. Through his experiments and persistence, the Zamboni ice resurfacer was invented. The machine he developed for his own facility was soon recognized as being indispensable for an efficient operation and has had a tremendous impact on skating and ice sports. Zamboni ice resurfacers continue as the overwhelming choice of arena operators throughout the world... Frank Zamboni's belief in ongoing product improvement and innovation lives on today in the company he founded.

The employees of Zamboni honor the spirit of Frank Zamboni by closely examining every detail on the Zamboni ice resurfacer and then putting it to the test. There is no part on this machine which has not faced the challenge: "How can we make it better?" Most companies may think that this commitment to detail is unnecessary, but we know that it is this "innovative spirit" that made Frank Zamboni what he was then... and makes Zamboni what it is now:

The maker of the world's leading ice resurfacing machine.

Nothing else is even close.

Proven Value

The highest residual value speaks to Zamboni's construction and durability. The industry's lowest cost of operation reflects Zamboni's superior design and execution. Tough materials and fabrication. Strong and hardy components. Efficient and powerful engines, motors and pumps. Zamboni remains the overwhelming choice for professional, private and municipal ice rink operators throughout the world.

Zamboni's powerful conveyor system provides the industry's highest snow compaction.

Uncompromising and Unparalleled

Our Attention to Detail is Legendary

Nothing about the Zamboni ice resurfacer is taken for granted. No detail is overlooked, which is why Zamboni remains the overwhelming industry leader.

Nothing else is even close

The Evolution of a Dream

Zamboni ice resurfacers have always offered unparalleled shaving and snow conveyor performance.

Proven Reliability

Operating an ice resurfacer in a busy single or double rink is a tough job in a harsh environment. Hourly cold starting cycles often extend for 18 hours and can severely test any equipment. Zamboni ice resurfacers meet this challenge every day. Our network of dealers around the globe stands ready to provide timely, excellent support.

"The principal product you have to sell is the ice itself."
- Frank Zamboni

ZAMBONI®

Proven Performance

Knowledgeable arena operators know that a quality sheet of ice is an arena's primary selling feature. Successful operators choose Zamboni ice resurfacing machines because they know Zamboni is the only real choice for unparalleled shaving and snow conveyor performance. Every feature on the 500 Series is deliberately designed to make ice resurfacing easier and to ensure that the result is always a *perfect sheet of ice*.

Frank Zamboni wouldn't have wanted it any other way.

This brochure has been prepared only as a general guide for the customer. Every effort has been made to assure that the information is correct at the time of printing. Some features described may be optional at extra cost and prices, colors, materials, specifications and models are subject to change. Some options are required in combination with other options.
